SYLLABUS

1. Data about the program of study

1.1	Institution	The Technical University of Cluj-Napoca
1.2	Faculty	Faculty of Building Services Engineering
1.3	Department	Building Services Engineering
1.4	Field of study	Civil Engineering and Building Services
1.5	Cycle of study	Master
1.6	Program of study/Qualification	Building Services for Regenerative Cities / MS Engineer
1.7	Form of education	Full time
1.8	Subject code	10.00

2. Data about the subject

2.1	Subject name	ubject name			Building Services Re	trofit Solutions		
2.2	Course responsible/lecturer				Assoc.Prof.PhD.Eng. Octavian Pop –			
2.2	Course respon	ISIDIE	lecturer		octavian.pop@insta.utcluj.ro			
		Assoc.Prof.PhD.Eng. Octavian Pop –						
2.3	.3 Teachers in charge of seminars		octavian.pop@insta	.utcluj.ro				
2.4 ۱	ear of study	I	2.5 Semester	П	2.6 Assessment		E	
2.7 9	2.7 Subject					DA		
category				DI				

3. Estimated total time

3.1 Number of hours per week	3	of which	3.2 Course	1	3.3 Seminar		3.3 Laboratory		3.3 Project	2
3.4 Total hours in the curriculum		of which	3.5 Course	14	3.6 Seminar		3.6 Laboratory		3.6 Project	28
3.7 Individual study:										
(a) Manual, lecture materia	l and	notes, bib	liograph	ıy						23
(b) Supplementary study in the library, online and in the field								9		
(c) Preparation for seminars/laboratory works, homework, reports, portfolios, essays							20			
(d) Tutoring								2		
(e) Exams and tests								4		
(f) Other activities								-		
3.8 Total hours of individual study (sum (3.7(a)3.7(f))) 58										
3.9 Total hours per semester (3.4+3.8) 100										
3.10 Number of credit points 4										

4. Pre-requisites (where appropriate)

	4.1	Curriculum	
	4.2	Competence	
5	. Re	equirements (where appropriat	e)
	5.1	For the course	Amphitheatre, B-dul 21 Decembrie Nr.128-130, Cluj-Napoca
	5.2	For the applications Laboratory	Laboratory room, B-dul 21 Decembrie Nr.128-130, Cluj-Napoca

6. Specific competences

 Implementation of new design strategies in order to minimise the energy costs and to extend the life of the systems from an aging facility Conceptual framework determination in order to be able to apply the optimal retrofit and sustainable solutions for the present-day building services Dimensioning of each type of building services for establishing the optimum retrofit and sustainable solution for the existing building services Economic analysis before and after the implementation of the building services retrofit solution Teamwork – the ability to synthetise and clearly define every team worker's job, ensuring an efficient exchange of information, knowledge and proofing good interpersonal and networking skills. Use of the IT&C technology. Adjustment to new technologies, personal and professional development by using specialized documents and software, and electronic resources written in an international language.

documents and software, and electronic resources written in an international language.	Cross	npetences		efficient exchange of information, knowledge and proofing good interpersonal and networking skills.
	Cross	competences		efficient exchange of information, knowledge and proofing good interpersonal and networking skills. Use of the IT&C technology.

7. Discipline objectives (as results from the key competences gained)

7.1	General objective	Implementation of new design strategies in order to minimise the energy costs and to extend the life of the systems from an aging facility
7.2	Specific objectives	Conceptual framework determination in order to be able to apply the optimal retrofit and sustainable solutions for the present-day building services.
		Dimensioning and economic analysis for establishing the optimum retrofit and sustainable solution for the existing building services.

8. Contents

8.1. Lecture (syllabus)	Number of hours	Teaching methods	Notes
Essentials aspects regarding the performance evaluation of the building services.	2 hours		
Aspects regarding the building occupants' needs according to the building old or new destination.	2 hours		
New technologies for buildings water distribution systems.	2 hours		
New technologies for buildings HVAC systems.	2 hours	Presentation	Video
New technologies for buildings electrical systems.	2 hours	and discussions	system
Optimal retrofit and sustainable solutions for building services.	2 hours		
Deployment of the BMS system in buildings.	2 hours		
Total	14 hours]	
Bibliography		•	

1. ASHRAE Handbook: HVAC Basics and HVAC System Efficiency Improvement, 2016

2. ASHRAE Standard 62.1-2004, Ventilation for Acceptable Indoor Air Quality;

- 3. J. F. Kreider, P. Curtiss and A. Rabl, Heating and Cooling of Buildings: Design for Efficiency, McGraw-Hill, 2nd Ed., 2002;
- 4. McQuiston & Parker, Heating, Ventilating, and Air Conditioning Analysis and Design, Wiley, 6th Ed., 2005;
- 5. R. W. Haines and D. C. Hittle, Control Systems for Heating, Ventilating and Air Conditioning, Boston: Kluwer Academic Publishers, 6th Ed., 2003;
- 6. Gh. Badea, Instalații pentru distribuția apei în clădiri, Risoprint, Cluj-Napoca, 2003;
- 7. Producers catalogues
- 8. GT 058 Ghidul criteriilor de performanța pentru instalațiile de ventilare.
- 9. GT 059 Ghidul criteriilor de performanța pentru instalațiile electrice.
- 10. GT 063 Ghidul criteriilor de performanța pentru instalații sanitare.
- 11. GT 060 Ghid pentru proiectarea instalațiilor de încălzire perimetrala la clădiri
- 12. I 13 Normativ pentru proiectarea și executarea instalațiilor de încălzire centrala
- 13. I 9 Normativ pentru proiectarea și executarea instalațiilor sanitare.
- 14. I 5 Normativ pentru proiectarea, și executarea instalațiilor de ventilare și climatizare.
- 15. I 7 Normative for design, execution and exploitation of the electrical systems for buildings.
- 16. SR EN 12464-1:2011. Lumină și iluminat. Iluminatul locurilor de muncă. Partea 1: Locuri de muncă interioare

2.2. Seminar (Joharston) (project	Number	Teaching	Notes
8.2. Seminar / laboratory / project	of hours	methods	notes
Project design topic presentation and assimilation. General	2 hours		
debate on the building blueprints.		-	
Performance evaluation of the effective building services:	2 hours		
HVAC systems.			
Performance evaluation of the effective building services:	2 hours		
water distribution.			
Performance evaluation of the effective building services:	2 hours	-	
electrical systems.			
Evaluation of the maintenance and operation costs for the	2 hours	-	
existing building services.			
Comfort demand of the building occupants according to the	2 hours	-	
building old or new destination: HVAC systems.		D

9. Bridging course contents with the expectations of the representatives of the community, professional associations and employers in the field

The competences achieved by the alumni are necessary in the field of design, production, consulting and marketing. Thus, the demands of the employees are being satisfied.

10. Evaluation

Activity type	10.1 Assessment criteria	10.2 Assessment methods	10.3 Weight in the final grade		
10.4 Course	Written exam	Test – 2 hours	50%		
10.5 Seminar /	Oral presentation of the		F.09/		
laboratory / project	project	Oral examination	50%		
10.6 Minimum standard of performance					
Students must pass the Laboratory test for the final exam.					
The components of the final grade are Exam (E) and Project (P).					
Thus, the formula for the final grade of this subject is $N = 0.5xE + 0.5xP$.					
The 4 credits are obtained only if N \geq 5, where both E \geq 5 and P \geq 5.
